Applicant(s)

ACHARYA ET AL.

Examiner

Walter D. Griffin

Art Unit

1764

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 25 November 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-25 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-25 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 25 November 2003 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Young (US 4,423,266) in view of Keville et al. (US 4,986,894).

The Young reference discloses a process for isomerizing hydrocarbons. The process comprises contacting the hydrocarbon with a zeolite catalyst at isomerization conditions. Prior to use, the zeolite is steamed under conditions including temperatures ranging from 250° to 1000°C

Art Unit: 1764

and steaming times ranging from 15 minutes to 100 hours. Zeolites used in the catalyst include ZSM-23, ZSM-35, and ZSM-48. These zeolites are unidimensional, 10-ring medium pore zeolites. The catalyst may also include a Group VIII metal and a binder such as clay, silica, or alumina. The relative proportions of zeolite to binder range from about 1 to 99 percent by weight. See column 1, lines 57-66; column 3, lines 19-31; column 5, lines 4-36; column 7, lines 24-28 and 38-68; and column 9, lines 61-68.

The Young reference does not disclose the hydroisomerization conditions or the use of a C10+ feed, does not disclose the alpha value of the steamed catalyst in relation to the unsteamed catalyst, does not disclose platinum in the catalyst, does not disclose the steaming condition ranges, and does not disclose the product selectivity improvement.

The Keville reference discloses the isomerization of C10+ feeds over platinum and zeolite catalysts. The isomerization conditions include temperatures ranging from 480° to 930°F and pressures ranging from atmospheric to 3600 psi. The Keville reference also discloses that the catalyst should have low acidity. See column 2, lines 59-68; column 3, lines 1-13 and 33-42; and column 9, lines 31-50.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the process of Young by utilizing the feed and the conditions disclosed by Keville because the isomerization of C10+ feeds results in products of improved flow properties and because these conditions are effective for the desired isomerization reaction of Young.

It also would have been obvious to one having ordinary skill in the art at the time the invention was made to adjust the steaming conditions within the ranges disclosed by Young so

Art Unit: 1764

that the alpha value of the steamed catalyst does not exceed the alpha value of the unsteamed catalyst as claimed because increasing the alpha value would increase hydrocracking activity. This is not desired in an isomerization process. By obtaining a steamed catalyst as claimed, product selectivity improvement as claimed would also result.

It also would have been obvious to one having ordinary skill in the art at the time the invention was made to include platinum in the catalyst of Young as suggested by Keville because platinum effectively promotes the isomerization reactions.

Conclusion

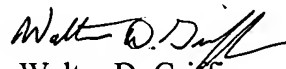

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Chester reference discloses steam treatment of catalysts.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Walter D. Griffin whose telephone number is (571) 272-1447. The examiner can normally be reached on M-F 6:30 to 4:00 with alternate Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Caldarola can be reached on (571) 272-1444. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
